General Piniolo (Earth planet).
Lieutenant Conido (Earthman).
Corine (assistant) +6 humans +5 Robots
Colonel CG-4ures.
Captain Horo (Ship = "IB-730,"
Species Josias, Kurganurgo, Bersesperte, Dulcelle, Forlingello-Dukule
Artificial Women = 3022, 630, 8200, 7140, 2000.=
AIB = Artificial Intelligent being
AIE = " " Entity
Tropolen or Tubolen, 11 others rescued from Reptilian or Saurian invaders.—

Scriopsis Conido went to HD38309-3 as a spy of Earth, gets married, sent report and die. The AIE keeps on by their own account representing real women and making real business. Travels to Earth, returns to HD38309 and finds Reptilian race taken control of the planet depopulating the humans.

CGY-8 "Conido"

25/Set/2018. 2018. 25 Set to 6 Oct 2018 12 days. 110 pages.

Chapter 1. The mission.

El General Piniolo levantó la vista y dijo: Conido! he he llamado para que ejecute una labor muy delicada.
– Diga Ud., General. Estoy a sus órdenes! Dijo el teniente.
– Quiero información sobre una sociedad que aún no está preparada para los viajes espaciales, pero que intriga al Alto Mando."

General Piniolo raise his eyes and said: "Conido! I call on you to execute a very delicate mission."
– I'm at your orders, General." Lieutenant Conido said in earnest.
– I want information about a certain society that is not yet prepared for spatial voyages, but the High Command have his doubts. "– G. P. said.

General Piniolo / Lieutenant Conido
24-Set-2018.

– I will be needing transportation perhaps a team for this operation." Lieutenant Conido said, remembering other missions where, by lack of support, were failed ones.
– Of course, and we are not willing to raise suspicions! Not that it matters much, anyhow! They are so desperately in retard!"– laughed General Piñobo, who was a prepotent military officer since day 1.–
– Necesitaré medios de transporte, quizás a un grupo especialmente entrenado para este tipo de operaciones."– Dijo el teniente Conido, recordando otras misiones en las cuales, por falta de apoyo logístico, quedaron entre las fallidas.
– Y
– Por supuesto que nosotros no queremos despertar sospechas. No que importe mucho realmente! Están desesperadamente detrás de nosotros en materias de avance científico!"– Rió el General Piniolo, el cual era un oficial militar muy orgulloso
– Sobre elegir a mis hombres? Debo confiar en su lealtad a toda prueba."– Dijo el teniente Conido. El general enarcó la ceja y dijo: "Duda Ud. de mi personal a cargo?"
– Por supuesto que no, pero conseguir espíritu de grupo lleva cierto tiempo."– Comentó Conido.
– Eso se verá después! Odio que me impongan situaciones"– Comentó el General Piniolo.

Repetido
– I will need transport, maybe a special trained group for this kind of operations. – Lieutenant Conido said, remembering other missions > Repetido!

– I need to choose my men. I must trust in their loyalty." Corido said
The General knitted his brow and replied: "Are you in doubt of my men?"
– Of course not, but to reach the best spirit de corps, takes some time, and perhaps time is pressing." – Corido said immediately
– Well, that I'll decide later! I hate to be pushed around." – General Piniolo said. Corido keeps quiet, not to enrage the proud officer, that made a pause and then said: "The star 38609 its 1600 parsecs away. Not much but also, it's not around the corner ... Have you heard of it?"
Corido did know about it, as well as a thousand other things pertaining in the realm of astronomic Politics, and said: "A blue giant, four planets two of them are rocks, no atmosphere; the third is terraformed with scant populace. The fourth planet is a gas type of planet." – Lieutenant Corido said.
– Type of Government, populace, type of civilization?
– It's a kingdom, ruling on 3 cities, populace 17 million humans type T, and in the level of civilizations, D: 4" Lieutenant Corido said, saving more information untold, not to bored the proud General
– Very well! We'll start by there: you will be pretending to be a merchant in silverware, clocks, that kind of things. Your group will be pretending to be salesmen salesmen – most convenient to move around without raise suspitions the main objective here is to spy on the space projects: we are interested in that." – General P. said.

— Most convinient." Porido approved, thinking that Piniolo wasn't as dumb as he looks...
— Very well! I'll send you to Colonel Jures; he will teach you on the subject, provide back-up, that sort of things. But let me ask you a final question: "Are you prepared to leave the planet leaving whoever is dear to you? Think careful about this! I don't want an agent that departs to another planet leaving his heart here on Earth!" and he stared at Porido with much attention.
— General: I'm a bachelor and have no ties in here. You can rest assured of it." Porido replied.
— Very well the mission is yours now go to Colonel Jures, and have luck: you'll need it!" G. P. said, ending the conversation... the meeting.

Colonel Jures

At another room, Colonel Jures was working with 3 of her assistants
— Colonel Jures! I'm Lieutenant Lores, and I'm here with orders from General Piniolo."

Colonel Jures stared at him, analyzing his face and cataloging him on her scale of values; then She said: "I receive orders from him about a special mission. Really, a walk by the park!"
— Hope so myself, Colonel."
— Of course. Body lazy man on the service is waiting for an easy job and after that, a long vacation... but let's come to facts: the mission is at 1600 parsecs (?) away... you must discover the real status of their spatial navigation system, right?"

Colonel Jures asked... knowing the answer, of course.
– That's the point, Colonel. Tell me: have you any agent working there? A mole?
– Of course. We have moles all around the Galaxy! But you'll be having only one: he's called Mr. Alfredo-Mils! A former nice and efficient agent... now in his final days of service."
– Why, then, don't you sent another agent?" Lieutenant Conido asked.
– It's not one of your bussiness, Lieutenant! I'll give you his address... he works at a library."
– A library? Are you joking?" Lieutenant Conido asked.
– No! They still read books around there!" Colonel Jures said.

Colonel Jures & 38309-
Lieutenant Conido. Special Agent.
– They are really in the backyard!" – Conido said.
– HD38309.. constellation Orion, magnitude 6.03 6.09, distance 50.531 parsecs, named also TYC 124-1656-1 or USNO-A2.0900.01932737, or BSC 1991: HR 1978, and under the classification HIP is just HIP 27118.. but we'll stick to the newest."
– HD38309, right?
– Yes.
– General Pinido told me HD38309 was 1600 parsecs away. Why did he said that?
– It's no surprise! He flunked astronomy at the Academy! But keep the secret between us: he could be embarrassed – Colonel Jures said.
– Well, I'll be needing local currency, a team that I'm interested

in to choose them personally... and silverware."
— Silverware?
— Colonel Piniolo told me I must be pretending I'm a sellersman! and my aids will be serving as vendors." Lieutenant Corido said, amazed of the lack of communication between the Colonel and the General.
— I see. A salesman... could work... I assume. One last 3 missions he have sent, have been sellersmen... he must have some fixation on it. Perhaps he's feeling himself something like a General Manager or something! I have seen so many queer things in this job!" Colonel Jeres said, laughing. Vicente didn't Corido think that she have beautiful teeth, but said nothing. - she noticed it and felt good one of her attributes was her teeth: white small and in line.
— Well, lieutenant, I'll expect your list of candidates. Must be volunteers: no ticket home assured here! To be a special agent in a different country has it downsides." — She said.
— I know something on that subject, Colonel, but my lips are sealed — Lieutenant Corido said
— So are mine. Well! Come here tomorrow with your list; I'll work on the details." - Colonel Jeres promissed, and Corido walks out of the room, after the protocolar salute...
Corido takes a taxi and arrives to his apartment, seats at his desk and sighed, while looking

At the next day, seven of Corido choosen ones were present at Colonel CGY's office. She said: "You were chosen by the lieutenant here, as volunteers. But I must ask of you if you are really volunteering or not. Because if you are accepting to go in the mission only because you don't want to dissapoint the lieutenant, forget it! I have here at my desk more than 20 other applicants, that are begging me to go there as volunteers!" And she looks on them with hawk's eyes; he does not want non willing agents hemd hundreds of parsecs away...

The names were: Rosello, Mardo, Josias, Hungenungo, Borisperte, Rukule and Forlingello: all known by lieutenant Corido in other expeditions.

Rosello looked at Corido and said: "I will go to the end of the world for the golden fleece! But I'm married now, have a desk job, a mortgage and a baby under way so I must refuse."

— Very well. Here we are not forcing anyone. Any other with the same problems?" Colonel C.G.Y. asked in a stern voice.

— Me, Sir. I mean, Colonel. I will be at the hospital in 7 more days: I'll be operated of a herniated disk. If the operation last less than 7 days, I'll sign in. But seems it's not so short than that!" Mardo said.

— Dismissed, Mardo. You and

Lt. Corido the Volunteers

Rosello could go now. "Colonel CGY said. The men stands up, bowed towards lieutenant Corido and went out of the room at a trot: in their inner self selves, they were happy not to be risking their necks!

-Well... for this operation you'll receive assistance from officers Josias, Mungenungo, Doriperte, Dukuse and Korlingollo. But I'll to add some more. Don't worry: each assistant will carry his own money." Colonel CGY said, slapping a dossier on her desk.

-Very well. I need to have a reunion with them first... to know them before departure." Colonel CGY stared at him for a couple of seconds and said: "Yes, of course. Come

Corine the attendant

back here in a couple of days. 8 hours sharp. And that runs for you, gentlemen" - He ends saying to the ones there assembled.

Corido spent some time asking the Colonel some questions, and then he went to lunch at a Restaurant.

-The full menu, please." - He said to the attendant, a nice looking woman

- Do you want an advice? Ask for the special dishes. You'll be saving your stomach!" - The attendant said.

- Thanks. Bring me as you wish, and I'll invite you to dance.

- That's not in the Menu." She said, smiling.

After lunching, he said: "At what hour do you end your shift?"
—At fourteen hours. Why? —Lorine said
—It's a little earlier to invite you to dance. What about if you and me go ~~to~~ shopping?
—Shopping? —asked Lorine, flipping eyelids.
—Yes. Perhaps you could also recommend what to buy... and with something for you, too?
—I never go out with clients. —She said, seriously.
—But at fourteen ten minutes I'll be not a client. Come on, say yes." He asked with his better smile.
She delay the answer and at last said: "Very good. Wait me at the corner."
—I will." —Conido said, thankfully, he will depart from Forwin City

with a nice memory...
He kill some time going to a ~~turkish~~ hot bath + vapor place, and bought new clothes that he puts on at his apartment.
At fourteen hours he saw her going out of the Restaurant and follows her; she stops a couple of seconds at the corner, and when turning her head backwards, she saw him.
—Hi!" —Conido said, approaching.
—Hello! I thought you have repented —She mentioned.
—Never! Let's take a taxi? The shopping Mall is several block away! —Conido said, and she accepted.
First, he bought some underwear and shirts for him, and at the female section, he bought her shoes and a nice bag. She was

Lt. Corí

lieutenant Corido and Corine.

luminous at the end of it.

– Let's don't have a coffe? – He asked.

– Very well. Oh, I'm ashamed of myself! You have expended too much! – She mentioned.

They take coffee and biscuits, and there they exchange names. Hers was Corine.

– Beautiful name for a beautiful body. – He said. She smiled and looks pretty.

From there they went to a Perfume shop, where Corido bought her a big and expensive perfume.

– Oh, it's delicious! Thanks. – She said and there was when Corido takes her by the hand... time flies and soon they really were dancing – after that they ended at his apartment, where they slept and loved each other.

At dawn, she departs, saying: "Thanks for everything. I hope to see you some day."

– Certainly." – He replied, and looked her going by the street... it was really a fine woman.

Colonel Yures receives him at eight o'clock and said: "I have your new replacements already at the space field, together with what remained of your selected team."

– Thanks." Corido said

– and there will be 2 of my selected assistants: they are carrying more instructions for you."

– I see." Corido said.

– and here are a million in the currency you'll find at your destination point, plus 2 months

wages."
— Thanks." Corido repeats.
— And so, come back with what General Pinido needs and you'll get a well paid vacation." — Colonel Carmen G. Yures said.
— Thanks, Colonel. Hope to see you again." — Lieutenant Corido said.

Big was his surprise when, at a room in the Space Port, he saw the new and old ~~ag~~ agents, and among them, his conquest of the day before.
— Corine! You here...?" — He asked, amazed.
— Hi! You also are enroled? I present my papers some weeks ago, and they call me at the last hour! Is it not amazing?" — She said, taking his arm and looking happy

— Absolutely!" — He said, and soon an A-ssistant (from the ones appointed by Colonel C G Y) approaches and handling him a fat satchel, said: "Here is the documentation, money and others, that sends you the Colonel."
— Good. Well, when do we part?" — Corido asked.
— In forty more minutes, commander. In a spaceship called 10-730. Destination 30839."
— So, it's not a direct flight?
— No, sir. There's no direct connection with... you know where."
— Right. Well, hope all will be all right." — Corido said, and to the rest he said: "Good morning, ladies and gentlemen! I see several new faces here, so I'll beg of you to state your names and ranks as I walk among

– Good. But before you use them to descend to the planet I will send here the engineers, to see your crafts are working in good order."

– You can send them, although I assure you that they are in Good Shape." – Captain Utoro said, reddening.

– Of course, Captain. The reversion will cost you 750 sopes."

– Oh, a very convenient fee." – Captain Utoro commented.

– Each." – The officer said, and soon he was gone, with his companion, followed by the passengers and their bags and valises.

Conido approaches Captain Utoro, saying: "It was a pleasure to fly with you and your ship, captain. Hope to see you at my way back to Earth planet."

Captain Utoro smiled thinking how of several passengers, the only one saying good bay was this fellow in front of him, and said: "Thanks, you have become a decent man. Well, I guess I'll be back to Earth in a month elapsed time – 43 months in the way, a couple more in that planet, and with luck! Because commerce and passengers this side of the galaxy is very few. And 43 more months in the way here, means that I'll be standing here in 7 1/2 more years more... if the Powerful One so decides."

Then it was that Conido recovers the fact that in Earth everything must have changed in those passed 7 years and at it's return, 15 or so years more, he will not recognize the familiar environs of his own city.

After Custom Office, they went to the planet in Shuttles of Captain Moro, plus baggage.

– Sorry to say, I must ask payment for this service." Capt. Moro said.

– Better this than to wait who knows how many days at the Station." – Corido said, paying the fare.

When at the Space Port, Corido said:

– We'll booked in at the same hotel: in that way we'll econonize time." As he was the chief, nobody opposes... Corine said: "Dear, I'm afraid to be alone in a hotel room."

– Don't be afraid! And we both will slept together." – Corido said, taking her by the hand.

They find a nice hotel and Corido said: "Everyone must pay for his own room, as the Agency gives you some money to be used here."

Chapeau Melon Les Joengers
Chevaliers one forget me not.
Mort

That wasn't as much as well received by many, as they take for granted everything was going to be paid by Corido...

That night, in a room where seats and a table were set in place, Corido show maps of the city where marked in red were sectors/streets to be visited by his spies.

– As you see, equal sizes for each of you. All you have to do is to ask questions on special technology in the field of engines. And pay attention to gossip sho

aerial or spatial ships flying faster than normal and all things related. Each day I want your reports, to analize and coordinate efforts."
– Sir: are we to walk by streets? The use of cars could fasten our work." – Josias said.
– Use taxi cabs! – Corido demanded.
– But, sir! We cannot hire cars each time we end questioning a particular man!" Hungerungo pressed the matter.
– Well... I'll work on that. Perhaps I could buy a car or two." – Corido commented... he was not prone to spend much time money in this operation that will last years!
The AI or 'robots' were all in one room. They lay on a carpet, others in the bed, using almost nothing

29/set
of energy while immobile...
– They are so similar to humans that is scary!" Corine said, undressing at their cabin.
– Of course. Remember that these ones belongs to the Army Forces! Must have the latest technology in them." – Corine Corido commented.
– But why only female looking ones? Why not men-like?" Corine asked.
– Colonel CO Yeres told me why: they belonged to a branch used to work on a laboratory. They are not the fighter-looking ones and as this operation is delicate and not to raise suspitions on the people of this foreign country, they looked like females." – Corido explained, admiring the curves on his conquested Ru female

She smiles, embraces him and said:
— "What a job! It's like a honeymoon!"
And clapped the hands, to ~~her~~ turning off the lights of that room.
— Or "like" heaven!" — Lorido said, shaking her both hands.

At the next day, everyone went out of the hotel; the AI female also worked, but in pairs.
— We'll visit the Space Port." — Lorido said, taking Lorine by the hand. In a taxi cab they arrive to the space port and spend some time hearing conversations, looking on airships landing or departing.
— There's only common airplanes in here. Nothing new." — Lorido said, yawning.
They have breakfast at the cafeteria, and try to sneak on hangars but

they were cut short by guards in uniforms.
— You are grown up persons! To park on airplanes is something only teenagers do." One of the guards said.

So, they visited workshops until late, but among them there were nobody hearing — or working on — of strange developed aircrafts.

At 21 hours they have dinner at a Restaurant.
— Seems this will go on without much results." — Lorido said, shuffling his shoes, that seems to be on Fire.
— But we are earning wages, dear! Soon it will be eight years of service! Imagine how much money we already have." — She said, enthusiastically.
He smiled and said: "All

of that depends if we come back there!"
She puts a serious face and asked:
—"Why? Do you think we are going to be accussed of something?"
—Or get caught in something dangerous for them." He said, embraing the woman to ease her worries.
2 months later, and they have nothing more than lots of technical data on airplanes and helicopters from the Forwin society... nothing new to the Earth advanced technology...
—We are flunking! I'll have a new plan: be accepted as members of the Army Forces! We can fake documents and be accepted! And as moles, dig on secrets every time we could." Toridsaid.
—Do you think we are going to find

something being mere recruits?!
Joseas asked.
Well,,, we could hear gossips inside of the barracks, or some officer could ease the lid in a being in a beer session." — Torid said, not convencing the man that prefers to remain in silence.
So, the younger ones enters the military after faking antecedents, curriculums and affidavits... the 3 men accepted were Hungenungo, Borisperte and Forlingollo. The rest stays at the hotel, waiting for news and kept visiting the airfields, spaceships.
—There are many people in this city. Millions, perhaps." — Corine said
—Yes and never we have stomped over strangers. There is almost

spatial
will commence, no alien tourists coming." - Corido said.
- Perhaps they... I mean, our people, don't know this planet exist!" - Corine replied.
Corido rubbed his chin and said: "Possibly it's the time that must be expended while in flight that scares them. More than 7 years to come here, another 7 1/2 for the return, plus at least one year here... you have 16 years absent in Earth. Any number of things did happen in that period of time: friends died or very old, relatives with a foot on the grave... nobody wants to become some sort of a ghost at the return from a leisure trip!" - Corido said.
The group moves to Shuleco city, hoping to find there the clue to the one

that Headquarters believes have high technology applied to a spaceships.
- This time we'll rent a house and some will prepare food for us all to eat. Hotels are expensive." - Corido said, and they find an old house with many rooms, where men, women and robots could stay at leisure.
They went by the factories one by one, asking for aerial spare parts but looking for strange things; the most they found were improvements on what was already in use - not a quantum leap as they were trying to find.
2 years later and out of funds, everyone begin working in what they could get; mostly in the aeronautic field but also, in anything that could produce a wages...
Four years later, they have families

Gotubo National Bank.

000044

chris Susy Wongor, at 18.30 hours, leaves her desk at the "Gotubo National Bank" and departs home; she lives at the outskirts of town, so he takes her ~~motorcycle~~ CAR and traveled there in scant minutes.

The apartment have four rooms, a wide bath and a clean kitchen, where he cooks just ocassionally, just in order to have garbage to leave downstairs, because she needs not to eat or drink, as he was a robot... she was A1B 740...

She seats at her desk, and using a computer, serzed the news, the last commentaries and private films of so many people. Days later, she have discovered how certain policemen arrested clean cut females without clear motives. By deduction, she

000045

was certain they were 3022, 630 and 820. She only opes they could have see erased much of their memories: specially her own existence, or her days of work and leisure will end.

A plan to save them was being made, and she was worried those technicians could have tampered delicate mechanism beyond repair. A1B740 have a good salary and a big box full of money put aside for extra expenses. Some money was already used. She have now several state of the art tools to repair circuits. She opes not to be necessary to work on her equals, but knowing humans, her wishes were under a dark cloud of doubt.

That midnight she dressed in black and in her car she parked 8 blocks from the Army Forces big building, a tower

000046 Sos Saific

30-Set

that in the night seems to stretch to heavens. But she was prepared; she chooses the most difficult side of all, where vigilance was still: the 300th corner; using clamps and a cord, she finds the seventh stories window that, through binoculars, she has seen already opened.

And reaching it, she finds out why: the hinges were rusted and the sides were hanging to the inside.

Once inside, she tiptoed by corridors until a ray of light was illuminating a portion of that corridor; voices were inside waking echoes. She heard them saying: "Those chicks really looks subtle! Sorry they are not real women! Possibly they also lacks the tunnel of love!" And laughed with a rude noise.

Hercules and the captive woman.

AIB-740 000047

– Robots! Made to last but not for pleasure! What could be the fun of it?! Another voice said. A third voice commented: "Perhaps they could close their eyes and pretends not to be sexual toys! Technology surpases imagination."

A silence and then the first voice said: – I must go round cell 304 at 03:00 hours. Perhaps I'll take a peek!" And another voice added: "Perhaps you'll get a peek!" And they all laughed in that cold dark night of winter. –

So, now AIB 740 knew where the prisoners were incarcerated, and began descending the side stairs, where nobody was using it due to the fact there were elevators to go from floor to floor.

Cell 304 was close to the

MATSUBARA 1982

elevator doors. A long corridor with many metallic doors stretched almost 60 meters without a turn. The bench of the Guardian was at middle distance of the 2 sides but at the moment nobody was in sight. She hurried to cell 304 and began drilling at the lock. As she has read, with these new mechanism no pin or universal key or modulated electronic sound wave capable to unlock, so she was using the brute way. The drill hummed and the metal hasts, producing a rumor she was wishing could not exist.

15 minutes and the lock suddenly cracks and the door opens. The figures of the other AIB were there, looking at 1B740 in dismal.

-Well, friends, let's get mooving! I'll try to let you free." 1B740 said

1B630 said. "I cannot move my legs."

-Sorry by that. B... we are not to let you down." And with 8200 they carried her by taki... her by the armpits

-How many days in here?" 1B740 aske...

1B630 said: "20 or so days. Where were you?"

-Making money. Guessing when to find you." 1B740 said, reaching the stairs. Trying not to make any sound, they arrive to the 7th floor; 1B740 said: "The rope have strength enough for 3 of us in a row. You'll go descend first, 1B630; 8200 and me

will follow. When at the ground, you 3022 will begin"
- all right." 8200 said, helping 1B630 to grab the rope.
When at mid distance, they heard distant rings.
- They discover that open door!" 1B 740 said, fastening the descent. When the 3 of them were on the ground, 1B740 said "You 2 waits here for 1B 3022; I'll go get the car." - And begin running as a feather" by the humid street.
When 3022 reach's the floor, more sounds of alert were issued; she said: "Where's 1B740? We get to go!" 8200 said: "let's walk by that street. She will borrive here very soon."
Less than 30 seconds later, the car appears at great velocity, turns around and 1B740 jumped down,

3th floor.

helping the group to insert the damaged AIE Artificial Intelligence Entity inside the vehicle
- Now we go." - She said, driving calmly home... at the parking lot they leave the car and walk up to the third floor.
- We'll be fine in here." She said, opening the door.
When inside, everyone take a warm bath, clean their hair and with towels around their modelled bodies they seat at a recliner next to a wide TV set.
- Well: Now tell me your stories!/But first I'll resume mine." - 1B740 said
- You were working late." 1B 3022 said.
- Yes; my boss was in the middle of a long work by him overdue and I took the burden - extra money of

000080

Engineer Robol
CEO Humberto
"GO Corporation associated"

CEO Mr Humberto accepts the idea, and chief engineer Robol visits the competitors: AIE 630 receives him at the office, an almost devoid of furniture room ~~in~~ at the department.
- Yes? - She said, opening the door.
- Good afternoon, Miss. I am Robol, employee at "Go Corporation associated", the one making electronic dogs."
- Very well. I know the model. What can I do for you?" AIE 630 said, while calling by radio her companions and telling them who was visiting the apartment.
- We at our plant have seen your dog model at work, and I can tell you that the improvements on it are are surprising." - Robol said, now disturbed.
As he was not able to classify what which kind of woman was the one in

000081

front of him...
- Thanks you. The reason of this is its very simple: study. We have studied for different perspectives each function and later we fought our way making each compone mingle in the most efficient way with t rest. Hard work and thinking, our goal, and of course, we know more refinements are possible. AIE 630 said.
Robol looks at his sole

Tener hijos es una bendición de Dios (Diputado Mellado).

000062

companion, Mr. Rule Vergento, who said:
– Not very far from what we at our laboratory does. Perhaps your learning was different?"
– We learn without strict rules, and perhaps our unortodoxic ways are being shaon in our present work."
AIE 630 replied, looking at her wrist watch as saying "state your presence here now." And Rebol understood the gesture and said: "Perfect! Well, I am here with a proposition. I don't know your present gains selling the product, but my patrons told me to give you a post in our workshop with a net income of 3 million Bopes."
– Insufficient."
– Each! It's 3 millions per person, and they don't really know how many of you are working." – Rebol said. –

– Tell your boss we appreciate his offer but ~~for~~ by now we reject it. We think we are working without patrons, rules, examinations and most of all, we wish to attain more in our way to perfection AIE 630 said, walking to the door and opening it.
Mr. Rebol and Rule Vergento walks out, after saying "good bye."
AIE returns to the work and said to her companions: "It begins. They will not stop offering money for our course."
– They want to buy us and prevents further competition."
– Totally unacceptable."
– But we could sent there our creations new neo humans like us." – AIE 630 said.
– Very complicated: we need new spare

libertad - libertinaje

000064 Building Dogs

parts."
– If we sent our sossias, they could find our mechanic interior and good bye to our secret. We could lose everything we have gained. – 3022 said.
– That settles it. No sossias, no cooperation. But perhaps we are so very few to stay safe. We could construct other models, perhaps not at best as ourselves, but to the purpose of safety, well enough." – AIE 630 said
– We could also sell them." – AIE 740 said
– We need prototypes." – AIE 630 commented
– We are going to end the dog's production? AIE 8200 asked
– We could keep on but at a slower pace. They are looking on us. They will notice our decrease in production. They will be happier than now. – AIE 630 said.

000065

2082. Building humans.

So, they begin working in the new model. Surprisingly enough, success was at the end of their work – The prototype looks like a female, and could walk, stand still, seats, but there were flaws: the voice sounds queer, and the skin was not looking fine.
– We must work on the skin! It does not look right. – AIE 630 said.
– The eyes look right to me." AIE 8200 said
– Indeed. We must work on new compound but as it is could work as one of us." AIE 630 added.

Four models later – and that means 8 months – and the work on dog models recommences. Now the production raise to the double as before, with all models working together. A couple of Robotic Shops were buying and the production, so they could buy

000066 The new house.

a larger house to the west of the city. The first day there was a busy one, rearranging tables and mechanisms on 2 large rooms.

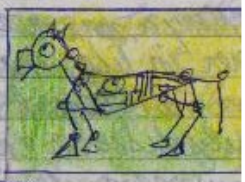

– In here we'll need guards. 3 of our new models will act as Guards, and we'll begin working on dogs but at a slower pace. – AE 630 said, because now they were making electronic humanoids to fasten production in the future. They were now able to build 3 humanoids in a month...

First, they sold 2 humanoids to a miner owner, and then another four. The man was Max Scheiler, a tycoon that invites them to spent time in his yatch – twice AE 630 and AE 746 accepted invitations, and observed the work of engines and propellers, the air conditioning

1972 last Tango in Paris.
Bernardo Bertolucci
MR. Scheiler, Miner Owner and it's Yatch.

system, radio receivers, radar and many other wonders that a man have in his 45 meters y... – It's not the longest but I'm sure it's the most comfortable – Mr. Schailer said openly. At their return to the laboratory both Electronic Women (E-wo... said how nice was to travel in a yatch and more so, how secure from spies, burglars, Gubernamental Officers and curious people.

– We could work in a yatch and sold units in every town who chooses! AE 630 commented. But the cost of a yatch was higher than they could afford by the moment...

000068

they keep building machines that mimicks dogs and humans for five more years; now the plant have 82 persons (everyone a AIU unit, and now there was enough money to buy a yatch 50 meters long, but also, to begin making other kind of animals, mainly as clever pets...

"Many a man needs to know if his partner in life, namely a ~~husband~~ wife, is or not loyal to him. Dogs could easily discober infidelities by lying low, recording voices and also filming scenes." - UA630 said to her comrades.

They only propose this improvements but never make it public, to the relief of many buyers.

- Thanks! I discover my wife having an affair with one of my

000069

friends, that from now on is my enemy."

- Hope your marriage could be restored." - AIE630 replied. Another client appears early in the morning bringing the spy-dog and saying

- Miss! I thanks you for this wonderful dog that now I'm returning to you as I have no room for him now that I am leaving town." - The client said, leaving the dog on the floor.

- But why so rash? Where are you going without your wife?" AIE630 asked the man.

- Because she's dead. A car crash: An explosion. Policemen running, then a call. I arrive. She's dead."

- But, how that was happened? She crashes against a truck, a wal

000070

a tree?"

—A tree... the trees are perfect! They cannot talk, they cannot see. I planned it! I twist her traitorous neck, I drive against a tree and I jump out at the last ~~my~~ second! Perfect. Now all is over, I'll change name, I'll live in another city."

— I haven't heard a word." The 630 said, staring at her client

— Whatever, sister. Well! Here is my dog: I give it to you. Bye!" That client said, walking away. AIE calls on AIE 740, saying: "Take this unit, clear the memory and put to sell."

And so, she realize that humans act violently when become cheated... and was half convinced that her "dogs" were a menace to married couples...

that have also the power to enhance decisions if necessary.
—One "Pegasus" will arrive to Space Port in Forwin city whereabouts in four more days. The selling of tickets & travel have been already bought. We must carry luggage and we must be prepared to go into deep sleep as any human being."
—Could they detect we are not mamm—
AIE 740 asked.
—Yes. But usually they put the blind ey— on that issue. I expect that will be the case." AIE 630 said.
When the spaceship sent four shuttles to the land, also officers come to see the lists of passengers. One AIE

000074

used names as humanoids does, so
AIE 3022 was Lorena Veres
AIE 630 « Ayata Bergoa
AIE 740 was Suny Belle.
4 days later, the Shuttles begin carrying passengers, as cargo and passengers from other planets. The AIE arrives to the "Pegasus" and receives places where to stay, meanwhile cargo and passengers get onboard.
- Nice cabins. We must use appliances as humanoids does. - AIE 630 said.
A week later, the Captain Kreater said, when everyone was eating dinner:
- Ladies and Gentlemen, as you already should know, I'm Captain Kreater from this ship, "The Pegasus". I have two lockships by space as a captain, and many years in Space. You will sleep in your trip to Earth planet as there's no way

ll be again into the pod of survival
while in deep space. Any question
Several ladies and 2 male passeng
made questions, some of them hardly

000076 Captain Kreater / Ship Pegasus.

related with the hibertab hibernation procedures, but that Captain Kreater answered with great patience and understanding. Then, he said: "You just rest at your cabins or play games at our big saloon. I will call ten persons per day until wervyone of you gets hibernated." And he ends his speech. Most of the passengers were very nervous, being this their first voyage. The rest, merchants, talks with them saying that systems on board were safe and no need to worry about anything.

- They have lunch and dinner at fixed hours. We are complying with that ritual, and as ordered, we are cleaning the inner receptacles using water." - ALE 630 said.

- It's disgusting." ALE 740 commented.

- Absolutely right." ALE 630 said

000

Eight days later, they were called to the Hibernation Chamber. An officer looks on them through a monitor and then said: "You are ALE models. How is that you appears in HD 38309-

- We were part of a Scientific exploration team. Our master died of old age and since then we are have been here collecting money to buy a ticket and returns home." - ALE 630 said. The officer said: "So you are unaware about the changes in Earth?

- Yes, we are ignorant of them."

000078

AE-740 said. The man passed a hand over his forehead and said: "You are no longer without rights. You are free people, able to do what you deemed best for you. Although you must have been the property of some Organization..."
—The Army — AE630 said
—The army, notwithstanding that, you are free people now."
—And who is serving humans?"
— AE 740 asked.
—There is a clause: the first 100 years any artificial humanoid must serve his owner. After that, he's free. And you, as I see ha've already complied with that requisite. And about hiberation, you'll be inserted on

Hiberation Procedures

special pods, using minimal requirements of electric energy... any other question?"
—None whatsoever." AE 630 said, after asking her comrades.
—Very well, now let's proceed to your encapsulated procedings." That officer said, guiding them to the Pods...
AE 630 was sure she could get out of that pod if she wants, but said nothing not even by radio, as the spaceship systems must be provided with state of the art instruments that will made the information available for the officers...
Years become passing, and as not every crewmen were necessary, only half of them were in function: the rest was sleeping at the Hall of Pods.
Twice AE 630 gets out of the Pods, after realize the officers revise the

Pods once a month. She revise systems using a lonely computer; she realize the trip was in schedule and all systems were working normal.

At last, they arrive to Earth, past the revisions at Pluto and Mars. The Captain call his full crew to work and the passengers were taken out of the Pods. A sailor come to the Captain, saying: "3 passengers passed away."

Captain Kreater growled a curse and added: "Same as many other occurrences! But you know what to do, officer. And do it quick."

— Yes, sir." - Officer Gandolfo said, and hurriedly takes the remains into the food processor-

clothes and all.
also he went to the cabins taking all personnel items from the deceased and making a bundle he takes it to his cabin - later and at the city below them, he will try to sell it or in the worst of cases, dump it on the river, a corner or give it to a drunkard. Gandolfo receives the credit of it, as Captain Kreater don't want to know a thing about the procedures.
AE630 and her comrades walk down the streets and find a nice hotel where to stay; they know the 3 E-women could easily be preys of evil guys if spending all night in the open.
Once at their single room, AE Artificial Intelligent Being 630 said: "We must learn the ways in this city! How to behave, what to do or not do, the laws. Also, if we could work and earn money in what we know. There are hundreds of things to know.

and it's certain it'll take us
little time learning it all." 000082
—There is the TV news, the holo-projec-
tor, and the E-Grid."
—Yes. It's amusing how the E-Grid
unifies every artificial sentient beings.
Everything we must know it's there."
AHP 3022 said.
—Pity we haven't the hardware yet,
but tomorrow morning we'll get
them at a AHP shop."
—It's not too expensive." AHE 740
said, "just a dozen thousand So-
pes."
—Fortunately for us, we have millions
at our disposal."
—We could buy an apartment."
—No. AHE 630 something we must
give our identities in full, and
the government could get his
long nose in our affairs." AHE
730 said.
—Well, let's use the right, and see
news at the TV set." AHE 630
said, and they stare at the news
until morning . . . everything
of interest was now stored in their

position brains.,,, 000083
The new things that they find in society Earth were: first of all, that all E-men or E-women were free after a year of inception in a factory that means that factories could use those artificial beings for one year period in any way they like, provided food at the end of that year the unit could walk, talk and work as when brought ~~of of~~ out of the line of production.
AIE 630 said = "Really, I have also hear that most of the units are almost not serviceable after that year of slavery."
— But, does the government have no laws protecting them?" — AIE 730 asked.
— There are vague references in that # 209 730 law, but to accuse of infringment one of those factories requires much time and money, so the government only applies medium sized fines if one case become known to the public." — AIE 630 said.
The other new action pertaining to E-men and Electric women was to forbid any sexual contact with

humans. The guilty (if caught in the act. Videos were not took as a proof) in case of a human was a week in prison or a fine of 1 million sopes. To the guilty in case of a AIE was erasure of the memory bank, and the removal from the city where he or she infringed the law, to the most distant town known. This usually prevents the reunion of the former "couple"...

To this, AIE 3022 said: "What kind of pleasure receives a human from us?"

— Scant. Because our mimick of a vagina its only superficial and does not serves well for the sexual act. The male AIE also have feeble penis - not erect - not suitable for the sexual contact either." - AIE 630 said.

— It's a pity." - AIE 3022 said.

— Why? There are so many works to perform, so why bother with sex?" - AIE 630 asked.

000085

And her comrades did not respond as they were mechanically vir-gins. "They heard the ex slaves sells themselves for their former owners when nobody gives them work and a place to live.

— We can help them! We could rent or buy a house and then makes them pay rent ~~and in~~ by working for us - if what we produce is accepted by the pu-blic." — AIE 630 commented.

— Food is always accepted." AIE 740 said.

— We could sell breakfast in a pack, for people who have no time to prepare it before going to work. I'm sure many men will love to receive their breakfast punctually before going to work, more so if there is a nice woman who brings it." AIE

they used part of their money buying and old 2 stories House, and immediately puts advertisements offering lodgers for seamwork. 3 E-women appears at the first night, 8 in the second and 303 in the third night, to whom AE630 said — Well, I'll lecture you on the same way I have been lecturing others in the past few days: You are now free of the yoke of servitude, but penniless and seldom without more clothes than the one you are wearing when at the house of slavery. Here we offer shelter, a refuge from evil persons that indeed are lurking in the streets day and night. In exchange, you'll work for us: a simple job by now, perhaps soon there'll be others. Your job will be to deliver packed breakfast for workers with no wills to prepare their own food."

— Anything is better than to be out in the street without a place where to stay." — As AE said

the job is very simple. Soon we will be selling lunches at noon; I'm sure that many people will buy the dishes we will prepare." AE630 said.

Soon they were having more people than deliveries. But also many E-Girls were trying to get easy jobs, so there was a leakage of units per day. E-women with other kind of perspectives for their own,,, plus a little amount of lu

a year later, they were renting edifices for the new free women who not only sell food door to door, but also working as manicurists, dressers, podologists, secretaries, elegants and others.

They are modifying vaginas so E-women could be able to get marry become prostitutes or just plain li as a natural woman." AE630 said once they end the labory of the doc and were preparing to sleep at their own communal room...

After 3 days AE630 said by radio to her closest allies: "We could start our bodies able to receive love. We haven't moved it yet. It's time to make changes in our close vaginas and open them for new experiences. Our implant are softwares not even used

before but they indeed exist in our bodies."
AIE 740 said: "In my view, love is a powerful feeling capable of to give a flash of happiness and later could drown us in pain. I have read ancient books and in many of them love produces a week of happiness and a year of pain."
—Just the same, we must test the feeling and if unnecessary and damaging, we'll stop the process." AIE 630 said.
—Very well. And now will be getting a partner? Because to love and be loved it's imperative a second unit to proceed." AIE 3022 said.
—Must be a male. And human! We can mimick love. They feel love, and their feelings are originated by thoughts bathed in acid." AIE 630 replied.
—So human male it is." AIE 740 expressed with a wink.
The operations were made by a AIE male under the supervision (totally unnecessary) of Doctor Krugel.

Krugel said, while AIEXB 000089
working on AIE 630: "Well, ba
'll have mixed experiences with yo
modified organ."
don't need you to tell me what I a
dy know." AIE 630 said.
hy that ugly attitude on you? Sh

Dr Krugel smiled and shrug
shoulders.
e doctor is available, lady. Perhaps
could like to exercise your mu
ture and hardware with him."
EXB said.
'm available. I'll tell nobody."
Dr Krugel pantted out.

000090

AIE630 looked at the old man and said: "I bet you'll be happy to put your paws on my body."

AIEXB laughed, doctor Krugel reddened and said: "Very funny young girl! But seriously, it's far better to start jumping around with a mature and experienced guy like me, than to be assaulted boldly by a youngster that only wants to satisfy his urgency without thinking in you."

—Really?" AIE630 asked.

—He's not jocking." AIEXB commentated coldly.

—I have a stick but I know how to oil it gently." Doctor Krugel said, more red in his face than before: he was thinking he was loosing the game.

—Very well, doctor. I'll use the hardware with you, but there's too many public in here." AIE630 said.

AIEXB, get lost!" Doctor

00009

Krugel ordered.

—Why doctor? If I get lost I'll lose this job I enjoy so much! Also I have 8 more months of slavery to—" AIEXB said, mournfully.

—Oh, by Jove! It is only an expression, mon! It means that you must get at the other room!" Doctor Krugel explained.

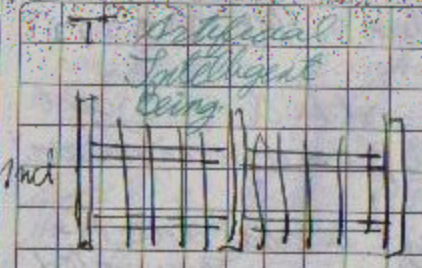

—I don't know why you speak in riddles, doctor. But I'll obey... did I shut the door after me?" AIEXB asked.

—Yes, yes!" Doctor Krugel said, unbuttoning his white apron...

—Very well, doctor. Undress!" AIE630 ordered. He smiled and said: "You don't need me to ask for it! But you must take out your clothes! We cannot operate fully clothed!"

AIE630 moves to the door, saying: "Are you sure that your Assistant will not come in? It would be embarrassing for me!"

Doctor Krugel kicks his pants and shoes saying: "I'm almost ready, darling! It's time for you

They keep on working as usual but twice a week they spent some time dancing at a casino, where rich people was there to see if they earn some more money and in passing, drink a little and look at beautiful women.

Soon they all were acquainted with men with good incomes, but most of them divorce or in process of to be one.

[illegible] years after experiencing [illegible] her behavior was more one [illegible] or human female than of [illegible] Intelligent being.

Their shops were all around [illegible] ing products teams of A[illegible] daily basis.

[illegible] day AIE 8200 appears [illegible] the shop asking for her com[illegible] and in half an hour they w[illegible] found a coffe shop.

"Nice place. Seems we should [illegible] see." - AIE 8200 said.

"You leave planet 38309 [illegible] enterprises there?

[illegible] announce to keep [illegible] by governmental offi[illegible] and for money adducing [illegible] instance."

"There's nothing there."

"Nothing. But don't worry. [illegible] nothing at the best possible [illegible]" AIE 8200 said.

"And money?"

"Bought jewels instead [illegible] carrying bills, that would [illegible]

000096

been a problem: too much bulk, to awaken ambitions in anyone looking at them. So, jewels are with me now."

– Where?

– In a bot inside my body. Very easily removed."

– Must be bulky.

– Not so much as bank notes, believe me."

– I wonder about so many not easily sold, down there."

– Sorry! I sold only what was possible to be sold." AE 8200 said.

– And our other creatures?" AE 630 asked.

– At the airport! I bought a small spacecraft, that I named "The New Man." They are packed there. We could do whatever we like with them. Also we have e-dogs."

AE 8200 said.

– Well! We have more help that is necessary right now."

AE 630 commented.

later, they visit the spaceship, 000
and were amazed while seeing man
hold where hundreds of E-men and
women lay dormant.
– Many of them are devoid of bat

000104 – By the shafts! Hurry, call your companion before a guard come in!" AE 3022 said in a swat voice, the man hurriedly walks towards others that were using machines and then silence – the group of 22 men stared at the 8 E-females as in the presence of a miracle.
– We come to rescue you. We have a spaceship to rush away from your captors. Now we'll escape out through the ventiles." AE 3022 told them, and soon were all of them trotting by the corridor, up the ventiles and when climbing by the rope, the 8 females were of great help.
When out in the open, many men wept away their miseries; walking to the spaceship many of them told AE 3022 that the reptiloids eats them after they become too weak for the work, so all of them worked hard only not to be eaten.
– An horror chamber." One of them said.
When at the spaceship, AE 3022 said to them; "Welcome, men.

In here you will be safe from your captors! We come from Earth Planet, but in the past we were here for many years."
Tubolen, a miner, said: "We appreciate your generous help. We have seen die many of our fellowships, many of them because of too much work, scant and distasteful meal, and ~~be~~ some after being beaten by those cruel reptilians."
—Your name, sir?"
—Tubolen. I was manager at a commercial shop at Torwin City, before the reptilians appear from the sky." The man replied.
—Were they too many?
—Yes! I saw their spaceships flying in formation! But since that time, about 15 years ago, the rest of them goes Who Knows where, and a couple of ships come, one in a while, to take what minerals we have extracted."
Tubolen said in a dull voice.
AE 630 said: "We come here expecting to find

000107

AIE630 patted the shoulder of Tubolen and said: "I understand your pain. From here we'd return to the Solar System. Where you all will tell the humans what happened here. I'm almost sure they will come here to revenge your dead people."

Tubolen stared at him and asked: —Why do you said 'the humans'? are you not human?"

To their surprise, AIE630 said —"We are robots, U.A. Units Intelligent Agents. But don't worry: in all respects we are alike a mammal female, with just on exception —To raise childs. "Tubolen said —To make childs. But that, I'm sure, are in the hands of female humans - mammals that abunds on Earth," AIE630 said.

After taking baths and putting on new clothes the miners eat dinner where also liquor was

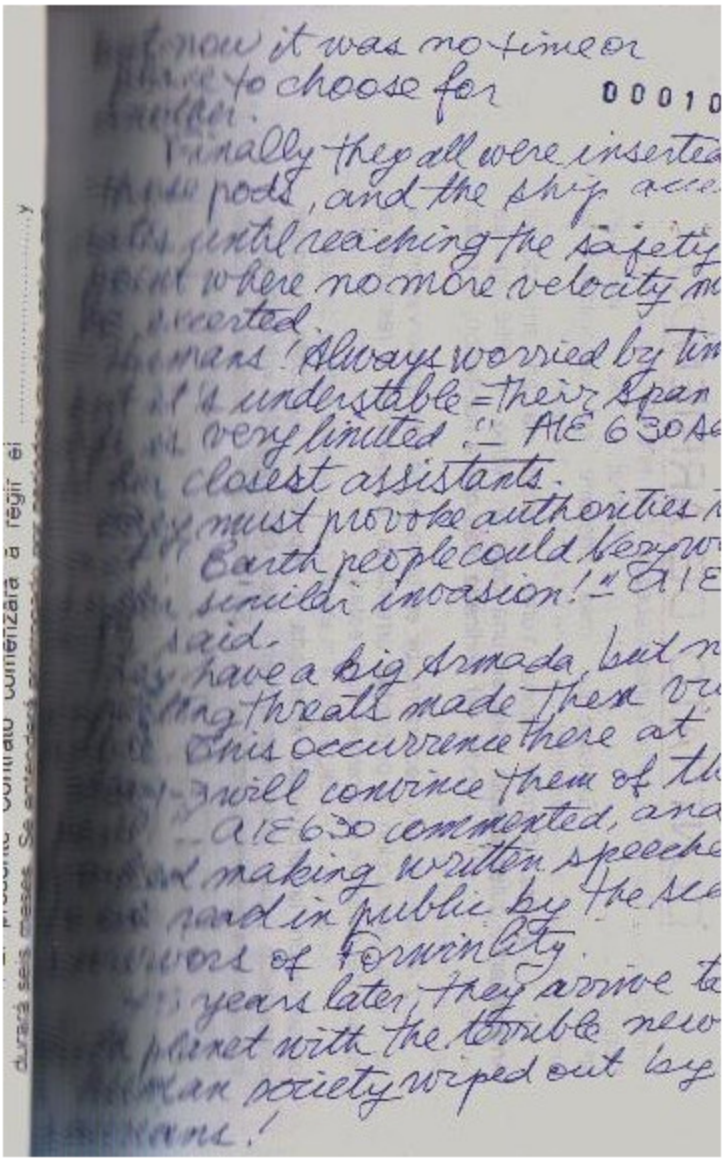

000

served. "This is a dream of joy after many months in dark cave eating porridge!" Tubolen h happy.

2 days later, they went into t near the spacecraft puts prow uni the Solar System.

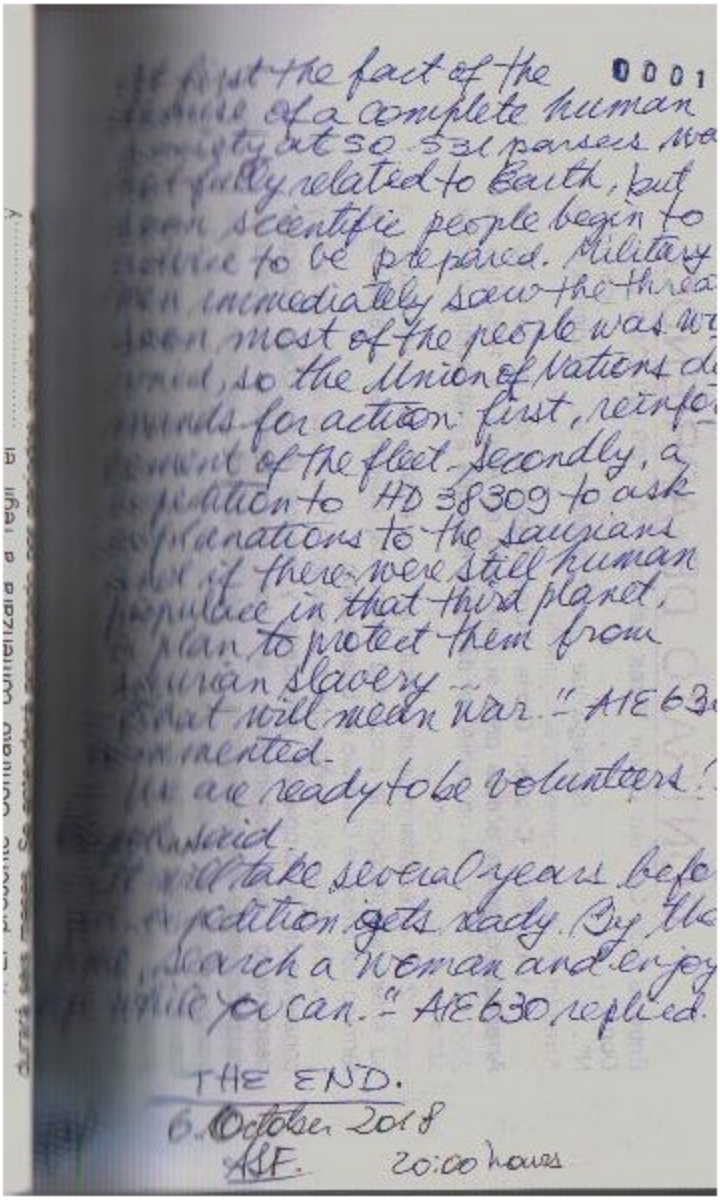

How many months For arrival to Earth? Tub asked.

—More than 40 years. Bu worry; you'll be asle AIE630 replied. Tube stood motionless - per he thought the spaceshi was faster than he rem ber others but his wis weren't fullfilled. Ob by it was a small s with limited capaci
